

Phone Server Solutions

TB4

Key Features

- Extremely flexible
- Easily expandable
- Rich feature set

Flexibility

The TB4 comes as a full featured ready to run phone system for your business. It provides all the services and features that you would need in your business. It has been designed and built with functionality that you will not be able to live without. Whether you are using a telephone company as your provider or want to switch to VoIP or have a mixture of both the system is ready for you.

Standard Features

You get all the features you would expect in a phone system.

- Digital Receptionist
- Extensions
- Voicemail
- Day/Night Control
- Music on Hold

Remote Extensions

With the TB4 you can have a remote extension in your Home Office connected to your Work Office. If you're on the road, you can connect through your laptop and make and receive phone calls through the phone system. You can even make calls from a coffee shop through your iPhone or iTouch. If you are looking for presence in other cities, the phone system can have multiple phone numbers connected to it and give your customers many phone numbers to contact you with.

Extra Features

You'll love receiving voicemail as an attachment in your email or access it through a web-browser. Other features include:

- Call Recording
- Follow Me/ Find Me
- Detailed Call Reports for Office Managers
- Conference Rooms
- Click to Dial
- Caller Queues
- Paging and Intercom

Contact Integration

You can make phone calls from MS Outlook or a CRM by pointing and clicking on your contact's phone number

Receptionist Drag and Drop Control

Using HUD the receptionist can simply drag and drop callers to extensions and voicemail. It's faster and easier than picking up the phone.

The TB4 comes in a mid tower configuration. It has a sturdy aluminum case and is certified with 80-plus energy efficiency to save you money on your power consumption. It is also available in a 4U Rackmount Chassis.

A typical SIP phone from Aastra Telecom integrates very well with the TB4. Big beautiful display lets you navigate easily and view stock quotes and other integrated programs.

The X-Lite software phone integrates easily with the phone system. It gives you the flexibility of making phone calls from your laptop or workstation. It's perfect for road warriors.
